Together, we can save a life

What Good Is A Blood Donor?

A blood donor is good for people who go through windshields and red lights.

For somebody with leukemia.

For people being operated on.

For barefoot kids who aren't careful.

For people who are into feudin' and fightin'.

For hemophiliacs and daredevils.

For people undergoing dialysis while waiting for a kidney transplant.

For people who fool around with guns.

For little kids who manage to uncap a bottle of something poisonous.

A blood donor is good for people who have been badly burned.

For new mothers who need transfusions.

For new babies who need a complete change of blood supply.

For people having open-heart surgery.

For cancer patients.

For people with severe hepatitis and anemia.

For kids who fall out of trees or whatever.

For anybody at any age with bleeding ulcers.

For people who were in the wrong place at the wrong time.

A blood donor is good for people who are in a lot worse shape than most people you know.

A blood donor is good for life!
